WE'RE PASSIONATE ABOUT EDUCATION AND THE OUTDOORS

LEARN THROUGH ADVENTURE

School Group Activities

Learning Outside the Classroom tackles social mobility, giving children new and exciting experiences that inspire them to reach their true potential. Real-world learning brings the benefits of formal and informal education together and reinforces what good educationalists have always known: that the most meaningful learning occurs through acquiring knowledge and skills through real-life, practical or hands-on activities.

Learning Outside the Classroom as a regular part of school life increases self esteem, and young people become more engaged in their education both inside and outside the classroom walls.

A range of school packages on offer

With a long history of delivering cutting edge outdoor learning we are the ideal choice for your primary or secondary school's outdoor educational visit. Whether you want to bring your class for an afternoon of adventure as a reward, a residential based around team working and citizenship or a particular subject area, we have a programme to fulfil your needs that is closely aligned to the National Curriculum.

Pupils leave with a motivation to learn more, with new aspirations and a new attitude towards learning. Possibly more importantly teachers and pupils leave our centres with relationships that have strengthened which benefits classroom based learning.

Outdoor Experience

Our team of instructors will immerse students in the outdoor environment, ensuring activities are fully resourced and a variety of teaching styles are utilised to make sure pupils will experience and develop tangible skills and outcomes that are useful both in the natural world and importantly, back in the classroom.

Outdoor Adventure

From their base in the centre accommodation block, pupils explore, paddle, cooperate, climb and think their way through a series of exciting skills. We believe adventure is the best way to learn and that's why we've packed this course full of opportunities for pupils to encounter new situations and to forge strong relationships that will benefit them in and beyond the classroom. This is an unforgettable programme of fun, challenge and adventure.

50/50 Adventure 50:50

This is an unforgettable programme of time between self-led sessions and instructed activities. We believe in learning by doing and embedding knowledge through experience. We work with you to design a programme that uses your curriculum expertise and our expertise in outdoors to ensure that your pupils haven't just read about it - they've lived it. Use our large hall or outdoor classroom for your self led lesson and let our expert instructors take care of the outdoor activities.

The Natural Curriculum

Make history come to life through our themed curriculum days to inspire pupils. It can have a lasting effect on their love of a subject. Live and survive like stone age man, learn what he ate, where he lived and how he hunted and add value to in-class learning.

Experience Days

Each package is specifically aligned to the National Curriculum and offers pupils an opportunity to be transported back in time to see how our ancestors lived.

Our most popular packages include Bronze Age Life, Stone Age Life and Superhero's. We can design bespoke packages around any element of the History syllabus and bring learning to life.
